

Why Choose Arctic Wolf® Security Operations?

Cybersecurity has an effectiveness problem.

Organizations have invested more and more in security tools—but the breaches keep coming. Verizon’s 2021 Data Breach Incident Report found 5,258 breaches, up 161% since 2019.

Why so many breaches? A security product detected a threat, but nobody responded to the alert. There was a patch for a known vulnerability, but nobody installed it. A cloud service was exposed to the public, but nobody noticed the mistake. An employee clicked on a phishing email but was too embarrassed to report their mistake.

These aren’t product failures. They’re operational failures.

Arctic Wolf Security Operations is a new approach to cybersecurity that solves the key challenges organizations face today. Each Arctic Wolf solution offers:

With these capabilities, Arctic Wolf can provide better protection—faster and more cost effectively—while eliminating legacy security headaches and accelerating compliance initiatives. It’s no surprise that Forrester found a 411% ROI for Arctic Wolf solutions, or that Gartner says that 50% of organizations will use MDR solutions by 2025 and by 2024, 25% of midsize enterprises will adopt security awareness training as a managed service.

Arctic Wolf Solutions

Managed Detection and Response

- ▶ In 70% of new customer environments, uncover threats previous tools missed

Managed Risk

- ▶ 80% of threats can be prevented by meeting the top 5 CIS controls

Managed Cloud Monitoring

- ▶ 47% of incidents we detect include a cloud component

Managed Security Awareness®

- ▶ 85% of data breaches result from employee actions
